The head (Human Asset Management),
Dangote Sinotruk West Africa Limited,
3 Oba Akran Avenue,
Ikeja, Lagos.
Ma,

I have been an admirer and consumer of the great work done by Dangote over the years hence my delight in tendering my application to request an opportunity to bring my own quota to this great Industry. Being a Diploma graduate of electrical and electronics engineering from Kaduna polytechnic, I am confident that my knowledge of power systems, machines, control as well as data analytics will be of massive value to this organization.

In my current role as a distribution system operator at Ikeja electric, I am responsible for operation and light maintenance of power equipment such as power transformers, circuit breakers, isolators, DC charger amongst others. I also ensure timely reports are carried out to reduce downtime, also ensure distribution of load as allocated to customers all to bring the company to profitability. At the course of my duty, I participated in the IE safetainability school to improve and develop myself for bigger roles and challenges ahead in accordance to the sustainable development goals.

I understand that Dangote Sinotruk is aiming to meet the expected current demand of this segment of automobiles required for logistics, consumption, food, and beverages industry in Nigeria by increasing its local production. I believe with my professional skill, experience and eye for quality service and growth, I will be a valuable addition to taking this dream to the next level

Attached to this letter is my resume and credentials which further details my contact, skills and educational background. I am also available to respond and provide evidence if clarifications are required. I look forward to an opportunity to speak further.

Yours Faithfully,
Attah Kingsley Williams
